gLike benchmarking

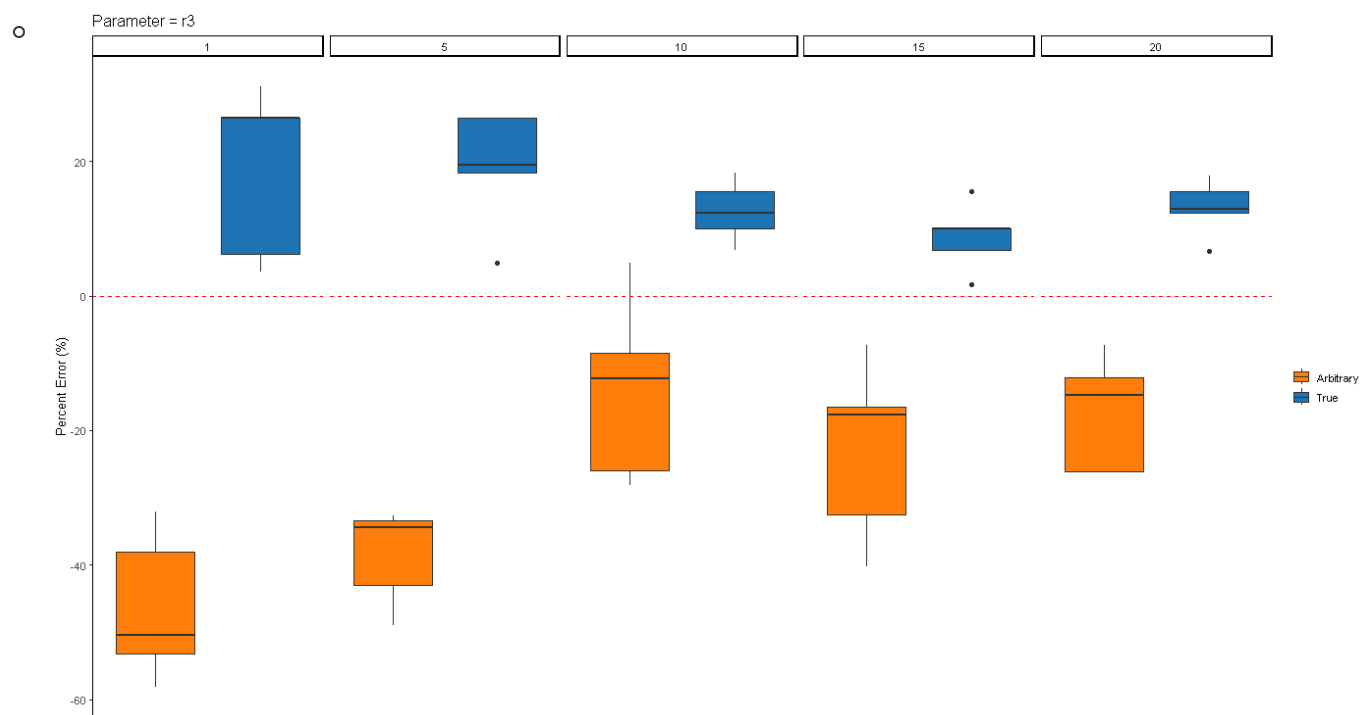

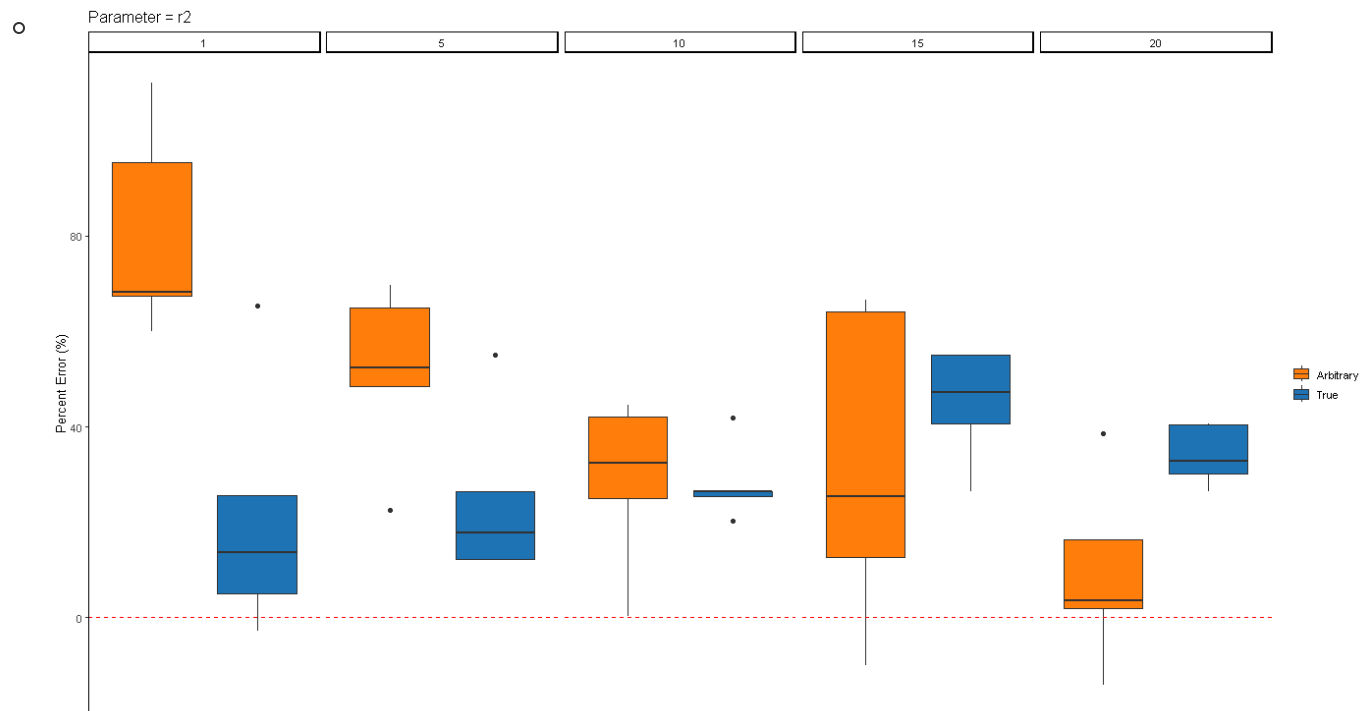

- Fix r_1 , r_2 , r_3 boundaries ✓
- Boxplots with percentage error or percentage bias ✓
 - Arbitrary initial conditions, what is the relative error?
 - True initial conditions, what is the relative error?
- Boxplots for log likelihood comparison
 - Arbitrary
 - Initial
 - @jonmah TODO (I forgot to print out the log likelihood for the "Arbitrary" data oops)
- Results, red line indicates percentage error of 0.

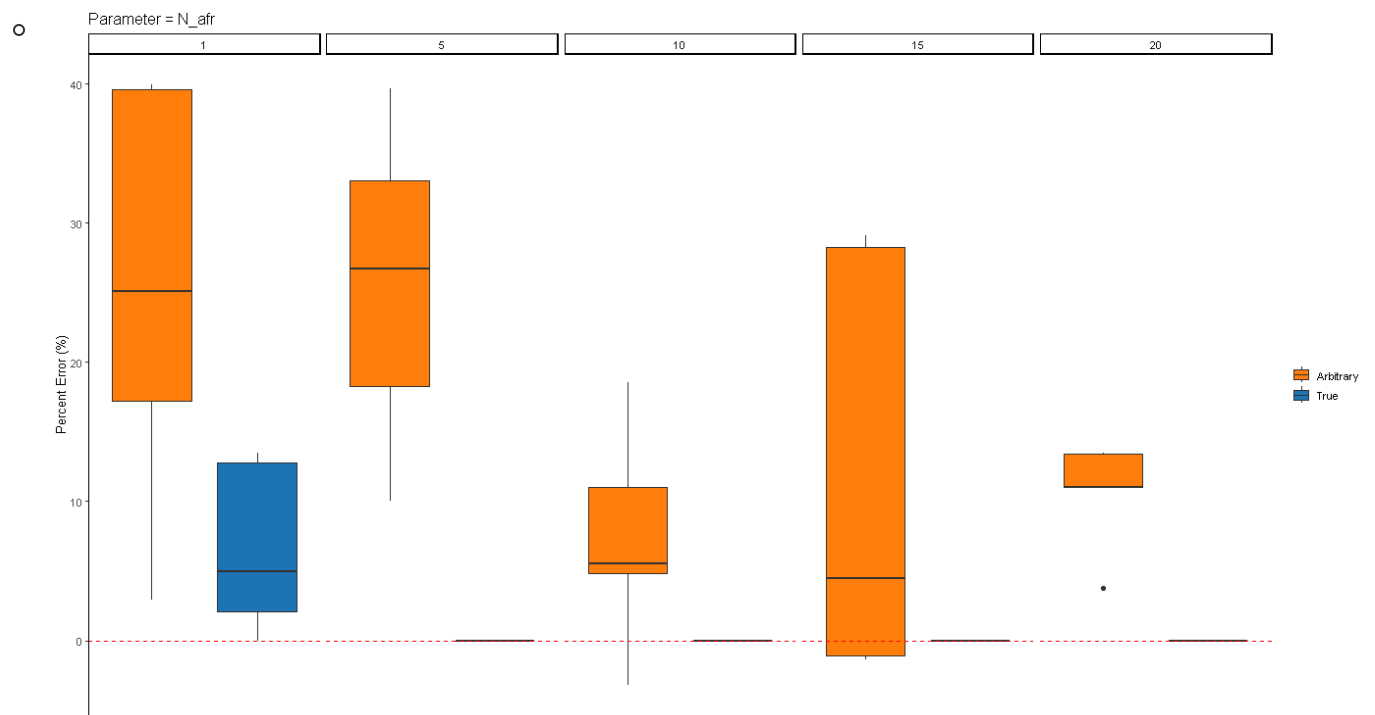

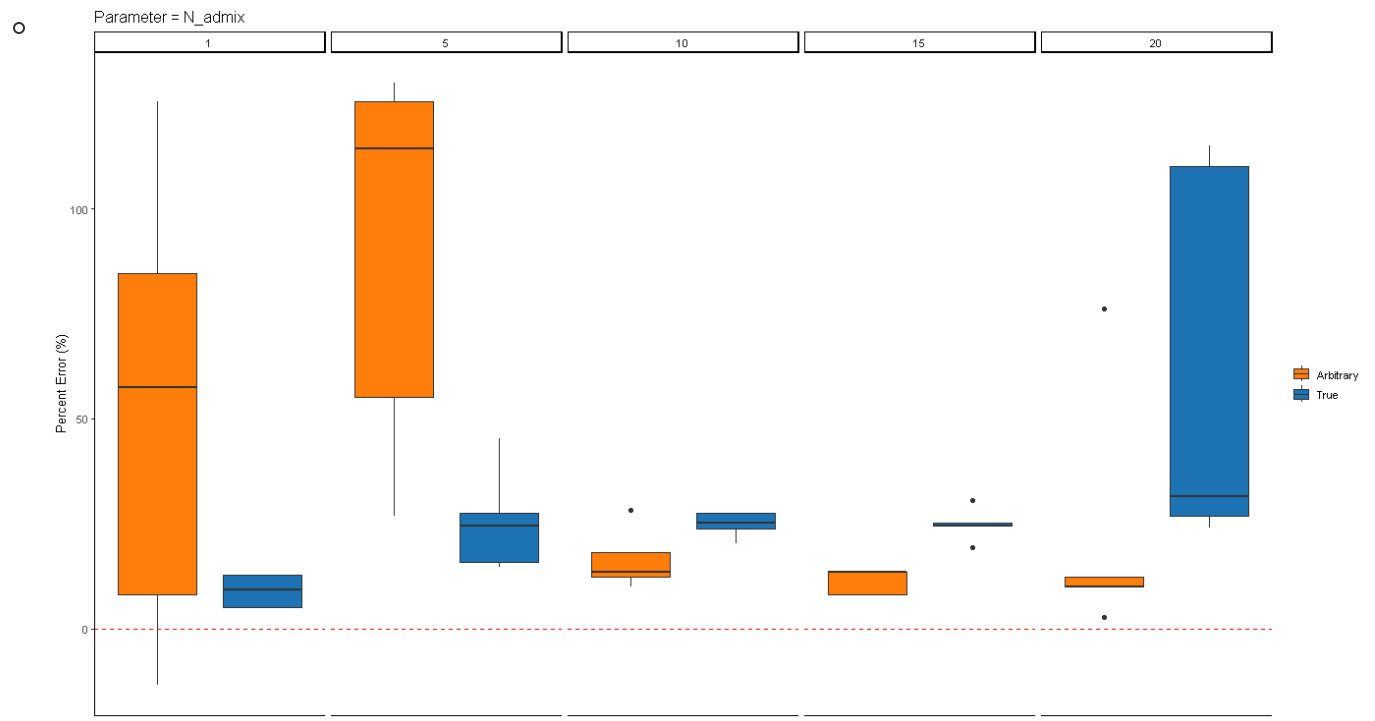

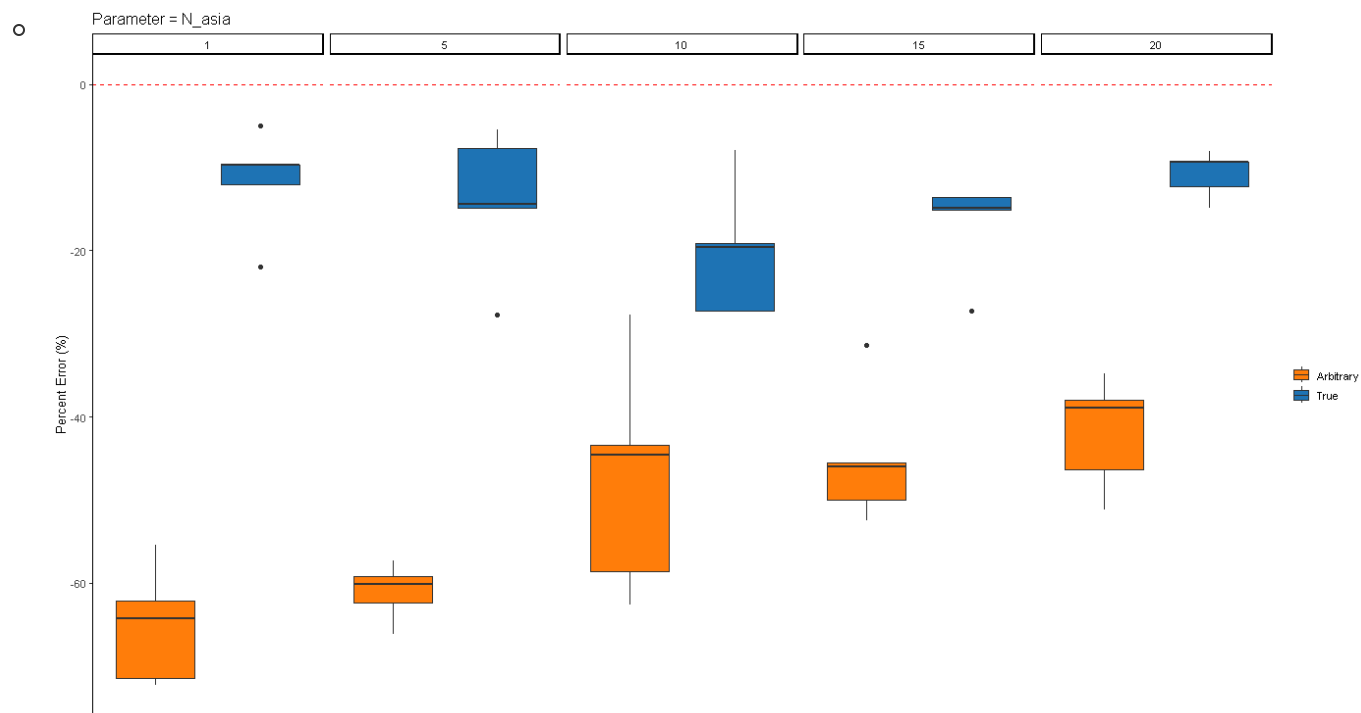

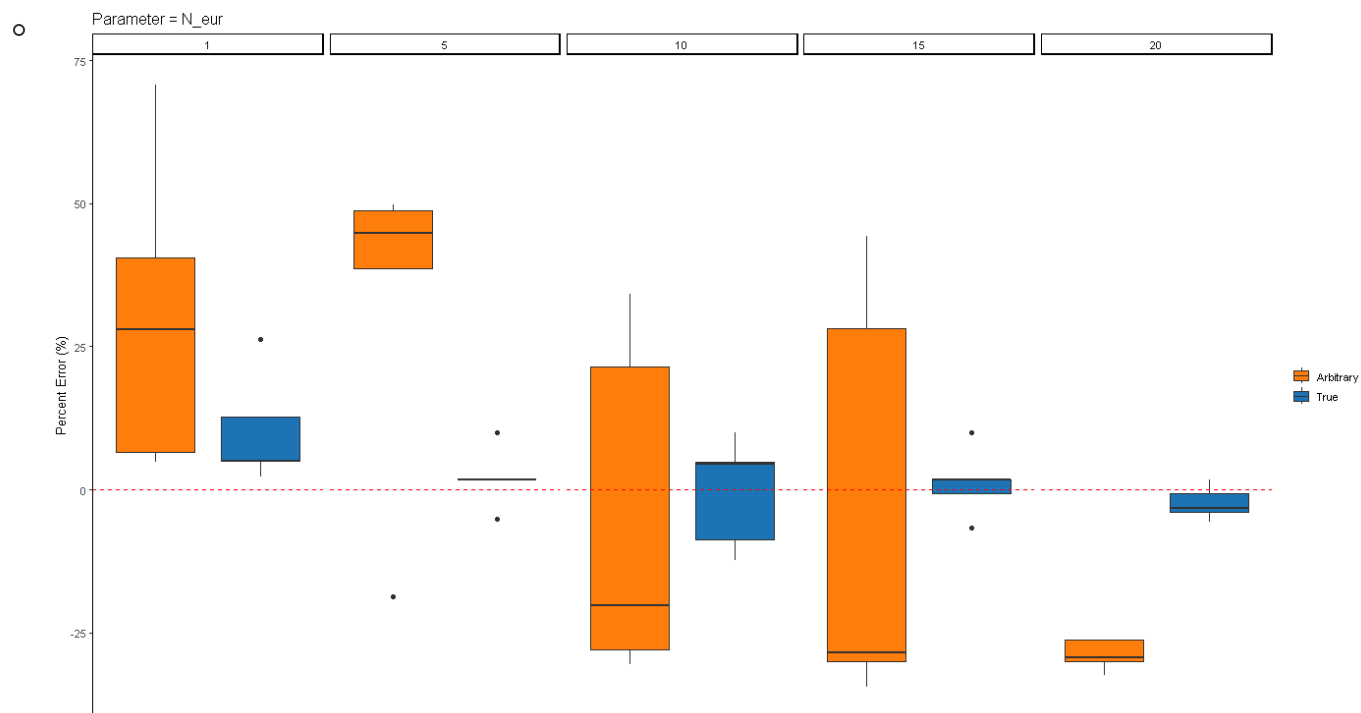

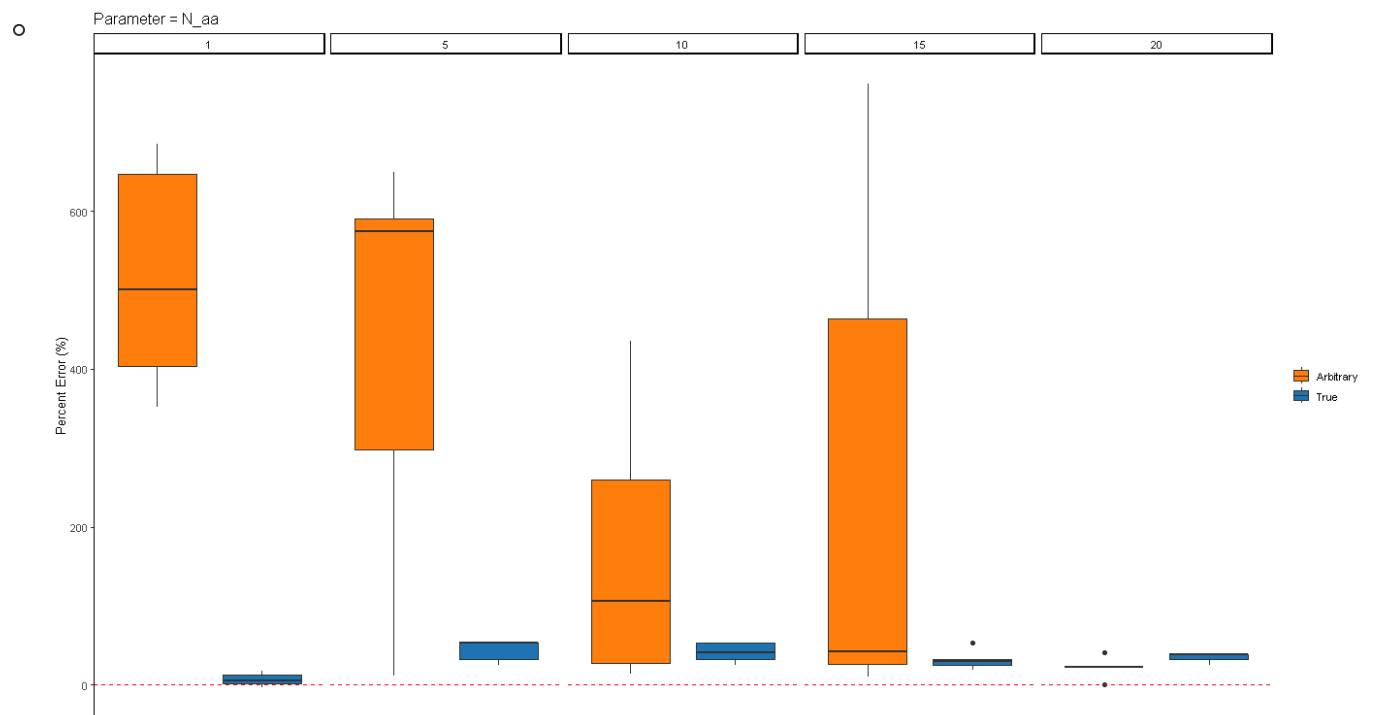

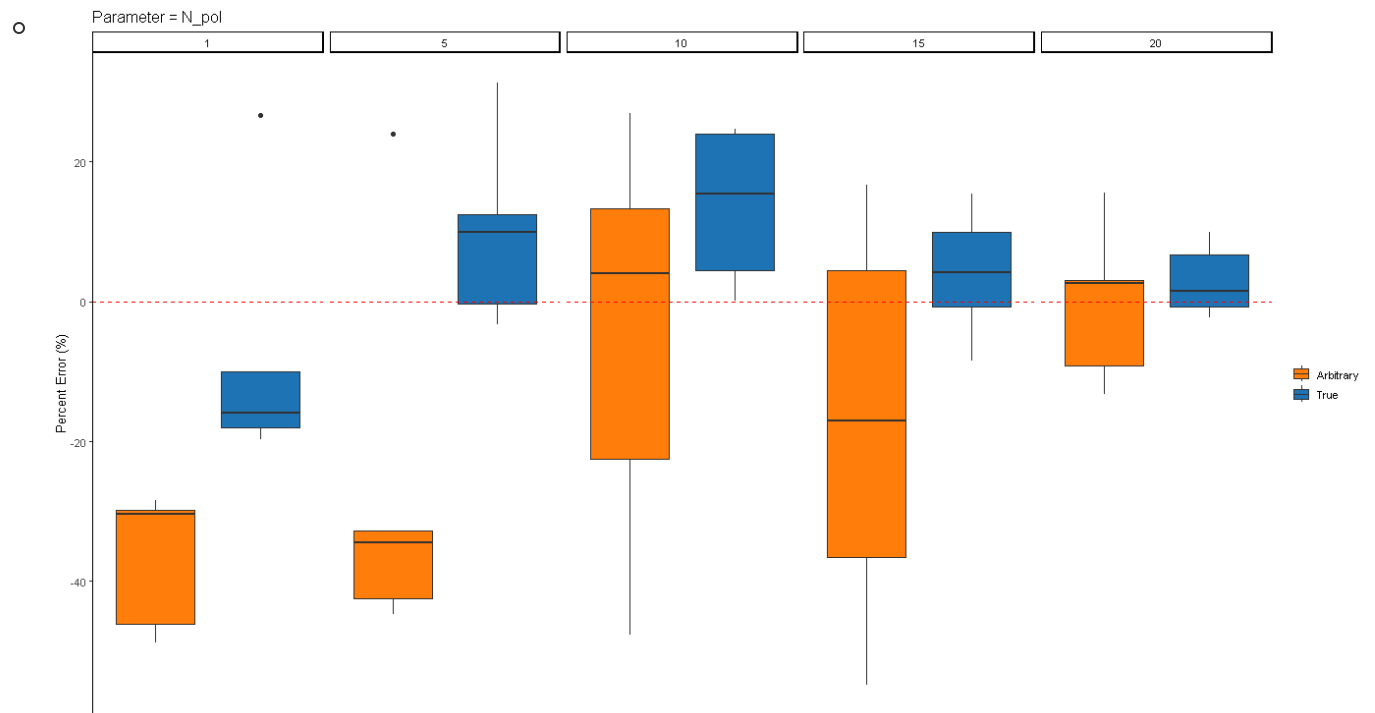

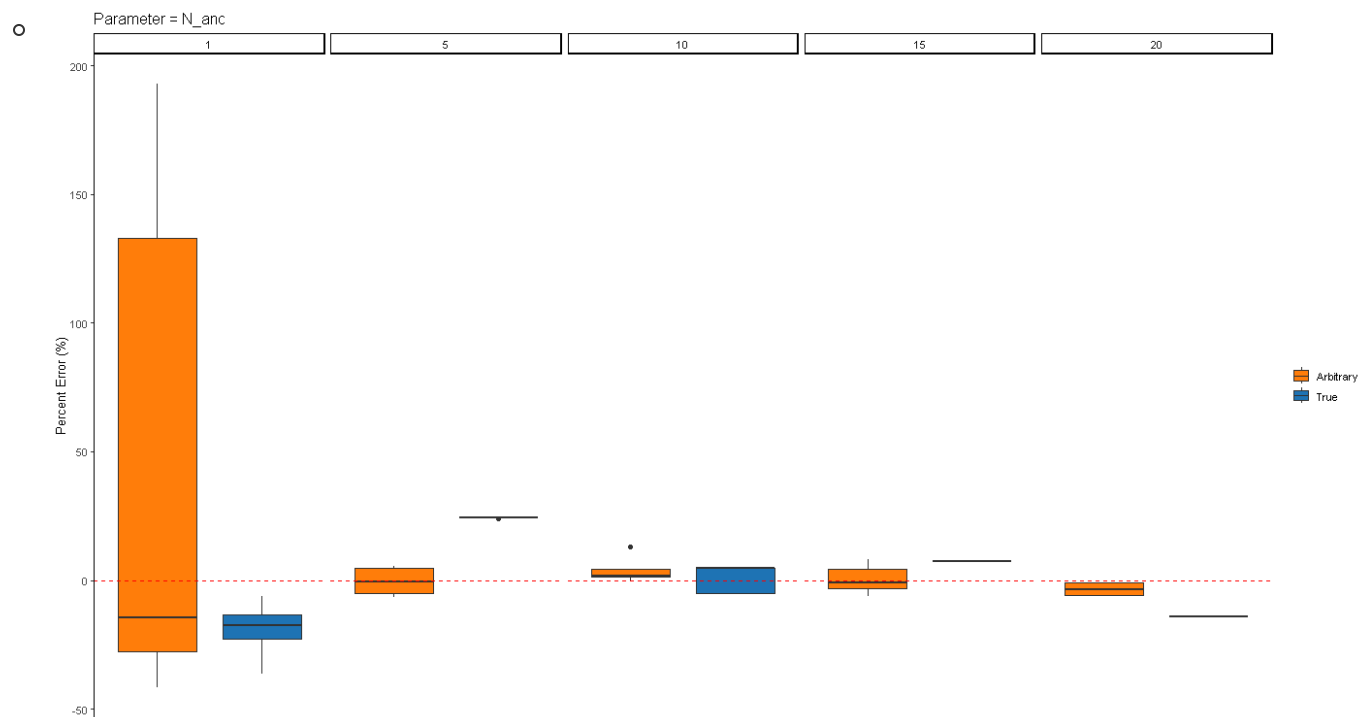

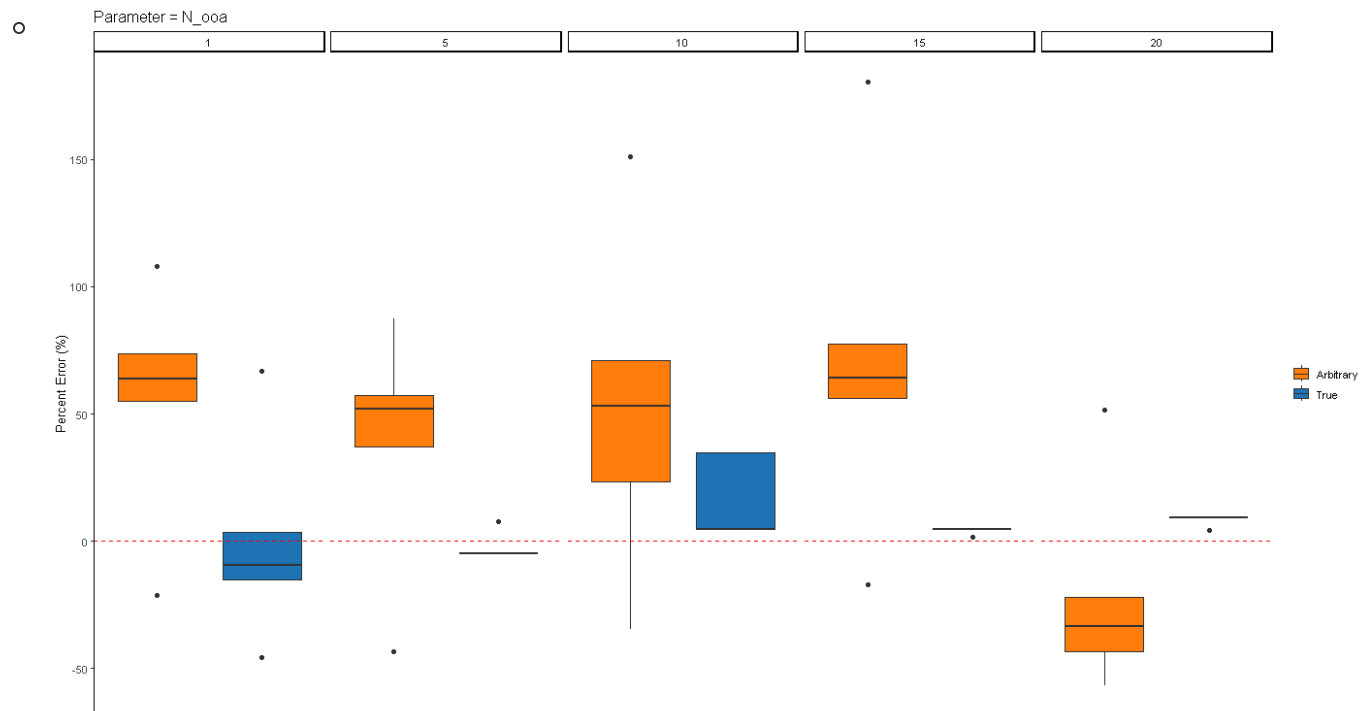

- NOTE: For plotting, the true value of r_1 is 0.0, however, we cannot compute percentage error, thus purely for plotting purposes here I show $r_1 = 0.01$ as the true value. Note that the important component is that when using arbitrary initial conditions, the best-fit r_1 is higher than the true value, but when given the true value as initial conditions, we accurately recapitulate r_1 .

This is an automated message from NCBI dbGaP (the Database of Genotypes and Phenotypes) Authorized Access system. Do not reply back to this message or send email to dbgap-reply@ncbi.nlm.nih.gov

Dear Jonathan Mah,

You have been approved by Charleston Chiang for dbGaP downloader privileges. You are permitted to access the system and download data on behalf of your PI in accordance according to governing policies and procedures. Please refer to the [dbGaP Code of Conduct](#) to review NIH's expectations for your conduct and your stewardship of dbGaP research data sets.

If you have any questions regarding Authorized Access Portal please contact the NCBI dbGaP [Help Desk](#). Please do not reply to this message.

- I can access and log in to dbGap

- ### My Research Projects

You are listed as a designated downloader. You can see which datasets are available for download by clicking on the "My Requests" tab above.

Our records do not identify you as a Principal Investigator. If you believe that this is incorrect and you would like to pursue access to dbGaP Controlled Access data, please contact your institution's eRA account administrator to have your record updated. If you are not a Principal Investigator, please contact your local supervisor to make dbGaP Controlled Access requests on your behalf.
